INDEX TO VOLUME 44

Aborigines
  Australian, eruption of deciduous teeth in, 1197*
  central Australian, size of dental arches in, 912
Abrams, E. J., 377†
Abrasion of dentin by toothbrush and dentifrice, a method for measurement of, 533
Absorption, retention, and distribution of strontium 90 from naturally contaminated food by female rabbits, 935
Accuracy in the registration and the transfer of mandibular functions, 1215§
Acid
  buffers, mechanisms of enamel dissolution in, 330
  dissolution rate of sound and white-spot enamel treated with tin(II) and fluoride compounds, 493
  mucopolysaccharides and the mineralization of dentin, 1205*
  solubility, protection afforded by stannous fluoride dentifrices, 3
Acids, strong, use of, for the sampling of small particles of enamel from specified sites, 1170*
Ackermann, D., 1133*
Aconitase-activating substances and insulin effects on the blood citric acid level and the periodontal tissues, 309
Acrylic resin, solvent crazing of, role of water sorption in, 1198*
Actinomycin D, effects of, on salivary glands, 1210§
Action potentials from dental mechanoreceptors in the dog, 1167*
Activation analysis, estimation of mercury in human enamel by, 654
Addington, L., 1214§
Adhesion, effect of a surface-active comonomer on, to diverse substrates, 1369
Adhesive bonding of various materials to hard tooth tissues, 690, 895, 903, 906, 1369
  bonding of dentin, enamel, and fluorapatite improved by the use of a surface-active comonomer, 906
  bonding to dentin improved by pretreatment and the use of a surface-active comonomer, 903
  bonding to dentin promoted by a surface-active comonomer, 895
Adrenalectomy and cortisone supplementation on caries incidence in caries-susceptible rats, the effect of, 96
Adsorption of tetracycline by dentin, 1184*
Aduss, H., 241†
Aerobic metabolism of oral bacteria, salivary volatile acids effect on, 1131*
Aerobic oxidative metabolism of oral tissues, biochemical and histochemical studies of, 1238
Afferent fibers of the vagus nerve, some reflexes mediated by the, 1215§
Age
  biologic, changes in dental arch dimensions expressed on the basis of tooth eruption as a measure of, 129
  race, smoking habits, oral and systemic disease effects on oral exfoliative cytology, 627
Ahrens, G., 1144*
Akiyama, T., 1152*
Akiyoshi, M., 1152*
Albright, J. T., 236†
Alexander, A. G., 1188*
Alexander, K., 302†
Alkaline phosphatase, temporal variation in the H antigen secretions and blood group associated, 1123§
Allan, F. C., 253†, 1002
Alloxan diabetic rats, the periodontium of, histopathological changes in, with, and without local factors, 1213§
Alloys, silver-tin, and mercury, reaction of, 701
Allred, H., 1176*
Altarelli, V. R., 648
Altemus, L. A., 1216§
Aluminum bonding to enamel with ultrasonic energy, 366
Alveolar bone
  biochemical investigation of, 1153*
  and gingiva of the guinea pig, malic dehydrogenase activity in the, 1151*, 1408‡
  growth and tooth eruption, 1211§
  resorption, a roentgencephalometric evaluation of, in edentulous individuals, 1213§
Alveolar nerve, inferior, in rats, sectioning the, 830‡
Amalgam
  alloy, spherical, 1210§
  condensation procedures, 1216§
  dental, associated with strain release in the silver alloy particles, dimensional changes of, 620‡
  dental, brittle fracture of, 977
  dental, microstructure of, 1002
  dental, tarnish of, 421
  finishing and polishing, 1210§
  polished surface, 1411‡
Amalgams
  dental, effects of adding indium to, 1162*
  spherical-particle, 1200*
  spherical-particle, setting reactions of, 1325
"Ambystoma mexicanum" (axolotl), ultrastructure of tooth ontogeny in, and its relationship to the phylogeny of enamel, 1163*
Amelogenesis in the upper incisor of the rat, cell height and nuclear volume in the enamel organ during, 1247
Amemiya, A., 1152*
Amino acid components in fossil plesiosaur teeth, 1186*
Amino acids characterization of dental enamel of genetically caries-resistant and caries-susceptible rats, 869
Amino groups, free, in sound and carious dentin, 1146*
Anabolic agents, biopharmacology of, studies on, 3-norethandrolone-induced experimental dental caries in the rat, 924
  studies on the biopharmacology of, 442

* Abstract.

† IADR Abstract No. Printed separately from the *Journal*.

‡ Annotation. § Title.

Anaerobic glycolysis in dental pulp, 521
Analysis
of endocranial contours by the mesh-grid system, 1201*
of metals in saliva by atomic absorption spectroscopy—calcium, 885
of metals in saliva by atomic absorption spectroscopy—magnesium, 890
ANBARI, N., 1056‡
ANDERSON, A. A., 1210§
ANDERSON, D. J., 1168*
ANDERSON, D. L., 200†
ANDERSON, G. S., 455†
ANDERSON, T. R., 1210§
Anesthesia, monitoring during, 1214§
Anesthetic agents, duration, comparison of two ultrashort, 13
Anesthetics, local, interaction of human serum proteins with, 1212§
Aneuploidy, X-chromosome, its effect on jaw growth, 269
ANGUIZOLA, C., 1212§
Angular changes occurring in the incisor teeth as a result of removable orthodontic appliance therapy, comparison of methods available for recording the, 1186*
ANNONI, J. D., 71
Anomalies, dento-facial, mathematical elucidation of, 1123*§
ANTHONY, J., 1140*
Antibiotics, dietary, further studies on the sensitivity of the periodontal syndrome in the rice rat to, 431
Antibody
formation by sensitized oral mucosal cells, 1215§
technique, fluorescent, to identify experimental hamster and rat strains of cariogenic streptococci, use of, 471
Anticaries, agents in animal caries experiments, methods of evaluating tin and fluoride salts as, 635
Anticariogenic agents, current research in, 1216§
Antifungal agent, endodontic, screening and selection of, 314
Antifungal properties of a new endodontal antiseptic containing 5-Nitro-2-methylfurfuryl ether, 1334
Antilactobacillus factor
human salivary, a serum depresser of, 850
toward various species of lactobacilli, the in vitro activity of the, 829‡
Antiseptic, endodontal, containing 5-Nitro-2-methylfurfuryl ether, antifungal properties of a new, 1334
Apatitic formations in hard tissues, calculi, and salivary stones, general aspects of the nature of thinnest electron microscopically dark-looking, 1131*
Aphthous ulceration, recurrent, autoimmunological investigation of, 1164*
Aphthous ulcers of the mouth, inheritance of, 837
APOSTOLOPOULAS, A. X., 222†
Apparatus and method for studying in vitro calculus, 648
Apparent relation between crystal orientation and reactivity in enamel prisms, 1160*
APPLETON, J. H., 2†
Appraisal of methods of immediate-denture treatment, an, 1200*
ARAN, A., 471
ARAN, A. P., 261†
ARAYA, S., 1146*, 1153*
Arches, dental, size in a tribe of central Australian aborigines, 912
ARGENTAR, H., 187†
Armadillo, pecularities of tooth replacement in, 1140*
ARMSTRONG, W. D., 38†, 582, 1213§
ARMSTRONG, W. G., 1186*
ARNIM, S. S., 268†
Articular remodeling, in the human mandibular condyle, microradiographic study of, 1156*
ARWILL, T. 1299
Ascorbic acid loading, intravenous, in subjects classified according to periodontal status, 355
ASGAR, K., 96†, 253†, 977, 1002, 1098
Ash: fluoride, calcium, phosphate, and water content of human dental pulps, 696
Ash, Ca, P, and Na content at different depths in caries, 362
ASH, M. M., 85†, 325†
ASH, M. M., JR., 351, 436†
ASHE, W. K., 196†
ATKINSON, H. F., 1040, 1199*
ATKINSON, P. J., 1179*, 1180
Atomic absorption spectroscopy
analysis of metals in saliva by—calcium, 885
analysis of metals in saliva by—magnesium, 890
Atypical L-forms from human saliva, isolation and characterization of, 1214§
Audioradiographic analysis of labeling indices and migration rates of cellular components of mouse incisors using tritiated thymidine (H^3TDR), 42
AURELI, G., 1131*
Australian (Non-Divisional) Section
Abstracts, 1191*
Index by Participants, 1204*
Autoimmune etiology, of pemphigus vulgaris, immunofluorescent studies on the, 1156*
Autoimmunological investigation of recurrent aphthous ulceration, 1164*
Autoradiographic analysis of cell proliferation in salivary-gland tumor induced by polyoma virus in dd0 mice, 1150*
Autoradiographic localization in fetal oral tissues of maternally stored Ca^{45}, 1272
Autoradiographic studies of collagen synthesis in bone, 1191*
AVERY, J. K., 312†, 363†, 411†, 1122§
AYERS, H. D., 382†, 517

Bacterial degradation of salivary carbohydrates, 1172*
Bacterial groups, selected salivary, enumeration of, 1343
Bacterial plaques and calculus distribution and their relationship to gingival inflammation, 1188*
Bacteriological examination of oral material by a differential counting technique, 526
Bacterionema matrucholii occurrence in gingival plaque and monkeys, 1189*
Bacteroides melaninogenicus occurrence in gingival plaque from monkeys, 1189*

Carbohydrate
destruction of DNP-amino acids by, 1186*
metabolism, gingival state and, 480
Carbohydrates, salivary, bacterial degradation of, 1172*
CARBONELL, V. M., 77†
Carboxylic acids, reaction of metallic oxides with, 1212§
Carcinogen exposure, hamster cheek pouch response to varying lengths of, 664
Carcinogenesis, salivary-gland, effect of systemically administered cortisone on, 1056‡
Carcinoma
chemically induced rat breast, tissue culture of, 1212§
human oral, tissue-culture studies of, 554
oral, leukoplakia, leukokeratosis, leukoedema, submucous fibrosis, and lichen planus, frequency in 10,000 Indians in Lucknow, Uttar Pradesh, India, 615‡
Caries
active and arrested, microstructure of, 1212§
bilaterality of, and its statistical analysis, concept of, 1227
Ca, P, Na, and ash content at different depths in, 362
concept of bilaterality of, a critical evaluation of the, and its statistical analysis, 1214§
dental, in the cotton rat, certain organic substances and their effects upon the incidence of, 596
dental, mechanism of action of fluoride in inhibiting, 1211§
dental, in the rat, modifications of the oral bacterial florae and their influence on, 1138*
dental, in Sprague-Dawley rats, effect of dietary selenium on, 826‡
dental, and trace elements in rats, 1207*
dental, and treatment needs of Australian school children, 1197*
dentin, streptococcal hyaluronidase and, 996
dentinal, microstructure of active and arrested, 1389
early dental, pulpal response to, 1045
early enamel, infrared microscopic study of, and caries-like changes produced in vitro, 1212§
effect of dietary pancreatin supplements on and on the composition of saliva, in caries-susceptible rats, 973
enamel, in deciduous teeth, some observations on the histology of, 1158*
enamel, not previously exposed to alcohol, the production of positive zones in microscopy of sections of, 142‡
experience, relationship of enamel solubility to, 1413‡
experimental dental, in gnotobiotic rats, 1213§
experimental dental, in the rat, effect of methandrostenolone on, 442
experiments, animal, methods of evaluating tin and fluoride salts as anticaries agents in, 635
incidence in caries-susceptible rats, the effect of adrenalectomy and cortisone supplementation on, 96
increment patterns in boys from two to twelve years of age, longitudinal study of the, 1214§
mechanism of early dental, studies on the, 873
natural history of, longitudinal studies of, 509
and nutrition in South Vietnam, 102
Caries-active surfaces in *Macaca irus*, effect of sugar solutions on the pH of, 1172*
Caries-incidence studies, a statistical confidence level for true per cent reduction in, 921
Caries-inducing effects in rats of diets containing icing sugar, cornstarch, and ground biscuits, comparison of the, 1174*
Caries-resistant and caries-susceptible rats (Harvard), response of, to a severe cariogenic challenge, 1402
Caries-resistant rats, genetically, amino acids characterization of dental enamel of, 869
Caries-susceptible and caries-resistant rats (Harvard), response of, to a severe cariogenic challenge, 1402
Caries-susceptible rats
adrenalectomy and cortisone supplementation effect on caries incidence in, 96
genetically, amino acids characterization of dental enamel of, 869
Cariogenic streptococci
tested in conventional Osborne-Mendel rats with an antibiotic-depressed oral flora, relative cariogenicity of three strains of, 1138*
use of fluorescent-antibody technique to identify experimental hamster and rat strains of, 471
Cariogenic streptococcus in relation to varying time of depression of the indigenous flora, 1138*
Cariogenicity of three strains of cariogenic streptococci tested in conventional Osborne-Mendel rats with an antibiotic-depressed oral flora, 1138*
Cariostatic activity of orthophosphates, effects of cations on, 416
Cariostatic-effect mechanism of oat hulls in the white rat, 1133*
Cariostatic effects of three types of phosphates when fed singly or in combinations in the diets of rats, 549
Carious dentin, human, histochemical observations on the lipides of, 1176*
Carious lesion of the enamel, porosity of the surface layer of the, 1134*
Carious and sound dentin, free amino groups, 1146*
